CERTIFICATIONS

- Certified Kubernetes Application Developer (CKAD)

PROFILE

Forward deployed engineer who embeds with customers to turn their problems into shipped solutions. Bridges product and field — building integrations, custom workflows and prototypes in Python and TypeScript, then feeding learnings back to the core engineering team.

PROFESSIONAL EXPERIENCE

Forward Deployed Engineer

2024 - Present

Mona AI · Berlin, DE

- Embed with enterprise customers to scope, build and deploy tailored integrations of Mona AI.
- Build custom data pipelines and API integrations in Python and TypeScript on customer infrastructure.
- Translate field requirements into product feedback and reusable platform features.
- Run technical onboarding, troubleshooting and solution design directly with customer teams.

Solutions Engineer

2021 - 2024

Datalix · Berlin, DE

- Designed and delivered customer-specific data integrations for an analytics platform.
- Owned technical pre-sales, POCs and post-sales implementation.

Software Engineer

2019 - 2021

Helios Robotics · Munich, DE

- Built backend services and tooling in Python for an industrial automation product.

EDUCATION

M.Sc. Computer Science

TU Munich · 2017 - 2019

B.Tech. Computer Engineering

NIT Calicut, India · 2013 - 2017
