- AWS Certified Solutions Architect – Associate

PROFILE

Engineering leader with a decade of full-stack experience, currently heading development at Mona AI. Builds and mentors product teams, owns architecture across frontend and backend, and ships reliable TypeScript and Java systems at scale.

PROFESSIONAL EXPERIENCE

Head of Development

2022 – Present

Mona AI · Saarbrücken, DE

- Lead a cross-functional team of engineers building Mona AI's core product across web and services.
- Own the full-stack architecture — React/Angular frontends with Java and Node/TypeScript backends.
- Established CI/CD, code-review standards and the team's technical hiring and onboarding process.
- Set the technical roadmap and translate product strategy into deliverable engineering milestones.

Senior Full-Stack Engineer

2018 – 2022

Cebit Digital Solutions · Frankfurt, DE

- Built customer-facing portals in React and Angular backed by Java Spring services.
- Drove the migration of a legacy monolith toward modular, independently deployable services.

Software Engineer

2015 – 2018

Rheinwerk Interactive · Cologne, DE

- Delivered web applications in JavaScript and Java for clients in retail and logistics.

EDUCATION

M.Sc. Computer Science

RWTH Aachen University · 2013 – 2015

B.Sc. Computer Science

RWTH Aachen University · 2010 – 2013
